

OATH OF RESIDENCE CERTIFICATE

DRO
PC

Used to:

- prove address when an elector has 2 pieces of ID with their name but none with their address - Oath 6

Elector must be accompanied by another elector who:

- lives in the same polling division
- has acceptable ID

69

Ask participants to find an *Oath of Residence Certificate* EC 50055 on their table and give them a few minutes to examine it.

Paraphrase the points on the slide.

Say: "The attestor must show proof of identity and address in the usual way and can only attest to one person's address."

Say: "The certificate includes two written oaths, one for the elector and the other for the attestor. The DRO must read the oral warning and both electors must sign the certificate."

Say: "If the elector or the attestor is not on the list, they will also need a registration certificate."

Say: "Notice the colour-coded fields. The Registration Officer or Poll Clerk pre-fills the orange fields while the DRO fills the blue fields. Make sure the certificate is pre-filled correctly before signing it."

Say: "For every elector who uses an oath of residence certificate, the Poll Clerk writes the elector's information and the attestor's information and ticks the box for oath 6."

Say: "If the elector is on the list, he writes this information on p. 4 and ticks the voted box on the list after the ballot goes in the ballot box."

Say: "If the elector is not on the list, he writes this information on p. 12 of the Poll Book and checks the 'Registration' box'. After the ballot goes in the ballot box., he also checks the voted box in the poll book."
